RECENT RELEVANT EXPERIENCE

MARCH 5, Uganda — *FullStack Engineer*

FEB 2022 - PRESENT

Collaborated within a cross-functional team of front-end and back-end developers to achieve project goals.

Led the development of a user-friendly website with captivating UI designs using React, Redux, and Material UI (MUI).

Played a pivotal role in testing software to identify and troubleshoot bugs, ensuring optimal performance before the application launch.

Demonstrated meticulous attention to detail during the testing phase, contributing to the delivery of a polished and high-quality final product.

Actively engaged in the full stack development process, showcasing a commitment to both functionality and user experience.

PROJECTS

FARM APPLICATION

Developed a React application that effectively handles comprehensive crop and sales management tasks within a farm setting. The application not only addresses the logistical aspects of farm operations but also provides insights into the farm itself, showcasing various agricultural techniques employed in the cultivation process
